

CAUTION!

BEFORE YOU LAY YOUR TILES PLEASE READ THE FOLLOWING:

Please check the tiles to make sure they are what you ordered.

If there is any concern regarding the quantity, size, colour, shade or variation of the batch, the tiles **MUST NOT BE LAID!** If a defect is discovered while tiles are being laid, work must stop immediately and your supplier must be contacted.

PRIOR TO LAYING TILES, THE HOME OWNER, TILER OR BUILDER MUST:

- Inspect the tiles for any defect.
- Check that the tiles delivered to site are the correct quantity, colour, shade and size ordered or selected.
- Check that the shades are consistent through the batch delivered.
- Ensure that there are enough tiles on site for the project. If not, order more of the same batch (tonality) before work commences.

DURING TILE LAYING WE SUGGEST:

- Mix tiles from several boxes to ensure “blending” of any inherent shade variation.
- Always clean any adhesive, grout and wax from the surface of tiles.
- If sealing is required, make sure that the tiles are thoroughly cleaned before sealing.

ADHESIVES, PRIMERS, GROUTS, WATERPROOFING AND SEALERS

- Prior to laying tiles read fixing instructions on labels. If the product is inappropriate to the job, please contact supplier.
- No warranty for fixing tile to blue board or particle board.
